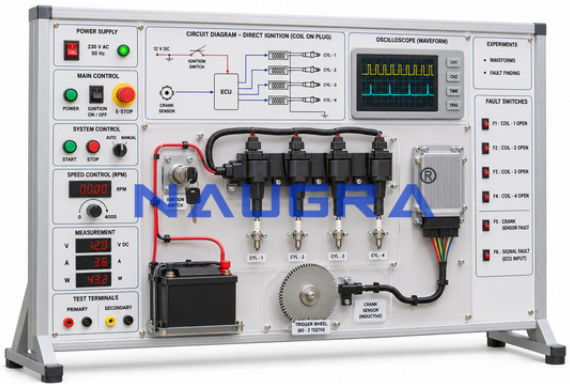
Product name:	Product code:
Direct Ignition Coil Pack Training Board	CMI-NP-0990



Description

A coil on plug and distributorless ignition training board with crank sensor, ECU simulation and individual coils, used for modern ignition training.

Technical specification

Spark plugs	4 nos
Speed	0 to 4000 rpm
Voltage	12 V DC
Experiments	Waveforms and fault finding
Power supply	230 V AC, 50 Hz

It demonstrates wasted spark and coil on plug systems with a crankshaft trigger wheel and sensor. Students observe waveforms and diagnose faults.

Features

- Crank sensor and trigger wheel
- Coil pack or individual coils
- Ignition driver module
- Waveform test points
- Fault simulation
- Speed controller

Technical Specifications

Ignition type	Distributorless / coil on plug
Coils	4 nos
Sensor	Inductive crank sensor
Trigger wheel	60 minus 2 teeth
