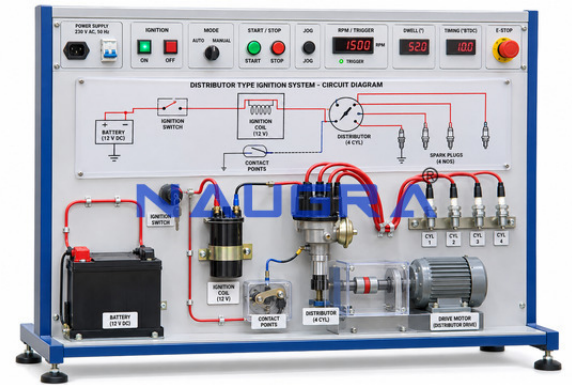
Product name:	Product code:
Distributor Type Ignition System Training Board	CMI-NP-0991



Description

A training board showing a conventional contact point and distributor ignition system with live components, used to teach spark generation and timing in automobile courses.

Technical specification

Drive	Electric motor to turn distributor
Voltage	12 V DC
Panel	Printed circuit diagram
Experiments	Dwell, timing, spark
Power supply	230 V AC, 50 Hz

Students see the battery, coil, distributor, condenser and spark plugs working, and measure primary and secondary circuit values.

Features

- Rear coil, distributor and plugs
- Contact breaker and condenser
- Ignition switch and battery connections
- Test points on circuit
- Spark gap visible
- Fault simulation switches

Technical Specifications

Ignition type	Battery coil, contact points
Coil	12 V ignition coil
Distributor	4 cylinder
Spark plugs	4 nos
