Product name:	Product code:
Magneto Ignition System Training Board	CMI-NP-0994

Description

A magneto ignition training board with flywheel magneto, ignition coil and plug used to teach self powered ignition in scooters, motorcycles and small engines.

Technical specification

Speed	0 to 3000 rpm
Trigger	Contact points or electronic
Panel	Mounted on stand
Experiments	Spark generation and timing
Power supply	230 V AC, 50 Hz

The rotating magnet generates electricity to fire the spark plug without a battery. Students learn the working principle and timing adjustment.

Features

- Flywheel magneto assembly
- Ignition coil and spark plug
- Contact breaker or electronic trigger
- Hand crank or motor drive
- Visible spark gap
- Cut-out section for study

Technical Specifications

Type	Flywheel magneto
Output	High tension spark
Spark plug	1 no, 14 mm
Drive	Variable speed motor
