

Product name:
Bourdon Gauge

Product code:
CIVIL-HET-123-0008

Description

Bourdon Gauge

Technical specification

The back of the gauge is enclosed by clear Perspex, allowing the mechanism to be viewed.

The read-out is by a substantial black needle on a 100mm diameter white face.

product is for both general and laboratory use.

The input metal tube is is rifled and designed to fit rubber tubing of 8mm internal diameter.

The gauge of rugged design is mounted on a heavy metal base giving great stability.

Calibration: Scales are given on the white face in both kg/cm² (black) and psi (red). Conversion to SI units (pascals) can be obtained with sufficient accuracy by multiplying the kg/cm² readings by 105.
