

Product name:
Conductivity Apparatus

Product code:
CIVIL-HET-123-0014

Description

Conductivity Apparatus

Technical specification

Rates of melting compared by placing wax on the ends of the different rods thus demonstrates rates of conductivity in the different metals.

Five rods, one each of aluminium, copper, brass, zinc and iron, embedded along one side of a metal tank, size 150 x 90 x 100mm.
