NAUGRA®

Product name:	Product code:
Pneumatic Dot Peen Marking Trainer	CMI-NP-0999

Description

A pneumatic dot peen marking trainer with stylus and XY motion that marks serial numbers and codes on metal parts, used in production and mechatronics training.

Technical specification

Marking speed	approx. 3 characters per second
Character height	1 to 10 mm
Control	Colour controller
Experiments	Serial number and data matrix
Power supply	230 V AC, 50 Hz

Compressed air drives a hardened stylus that makes a pattern of dots. Students program text and positions and watch the automatic marking cycle.

Features

- Pneumatic marking stylus
- Stepper XY motion
- Controller with keypad
- Part clamp fixture
- Adjustable depth and speed
- Safety guard

Technical Specifications

Marking method	Pneumatic dot peen
Marking area	100 x 40 mm
Stylus	Carbide tip
Air pressure	4 to 6 bar
