Product name:	Product code:
Mobile Hydraulic Training Workstation	CMI-NP-1009

Description

A mobile hydraulic workstation on wheels with power pack, profile panel and storage drawers for components, used for flexible hydraulic classroom training.

Technical specification

Gauges	Pressure and flow
Frame	Powder coated steel
Experiments	20 or more
Power supply	230 V AC, 50 Hz

All parts are in one trolley that can be moved between classrooms. Students build and test standard hydraulic circuits.

Features

- Trolley with lockable wheels
- Built-in power pack
- Profile panel for components
- Storage drawers
- Pressure and flow gauges
- Full component set
