Product name:	Product code:
Compressed Air Preparation Training Unit	CMI-NP-1010

Description

A training unit with filter, regulator, lubricator, drain and gauge to teach air supply preparation and its effect on pneumatic performance.

Technical specification

Maximum pressure	10 bar
Mounting	Aluminium panel
Experiments	Filtering and regulation
Power supply	230 V AC, 50 Hz

Students study air quality, pressure regulation and water removal using a transparent filter bowl and gauges.

Features

- Filter with transparent bowl
- Pressure regulator
- Mist lubricator
- Manual and auto drain
- Pressure gauges
- Shut off valve
