| Product name: | Product code: |
| --- | --- |
| CAN-BUS Lighting Control Trainer | CMI-NP-1018 |

## Description

A vehicle lighting system trainer controlled through CAN-BUS, including headlight, indicator and brake lamp control, used to teach networked lighting functions.

## Technical specification

| | |
|---|---|
| Faults | 8 nos |
| Test points | CAN-H, CAN-L |
| Supply | 12 V DC |
| Experiments | Lamp control and fault finding |
| Power supply | 230 V AC, 50 Hz |

A body control module sends lighting commands as CAN messages. Students trace messages and diagnose lighting faults.
