NAUGRA®

Product name:	Product code:
CNC Milling Machine Electrical Trainer	CMI-NP-1026

Description

A CNC milling machine electrical trainer with drives, power supply and I/O, used to teach installation, wiring and troubleshooting of CNC mill electrical systems.

Technical specification

Protection	MCB, fuses
Panel	Open frame
Experiments	Wiring, testing, diagnosis
Power supply	230 V AC, 50 Hz

Students trace wiring and fix inserted faults on a working electrical system, from servo drives to relay interface.

Features

- Servo drive modules
- Spindle drive
- Power supply and relays
- Fault insertion switches
- Transparent panel
- Wiring diagrams

Technical Specifications

Drives	3 servo drives, X Y Z
Spindle drive	VFD 2.2 kW
I/O	32 in / 24 out
Faults	10 nos
Control	CNC controller
