Product name:	Product code:
Cooling System Pressure Test Trainer	CMI-NP-1036

Description

A cooling system trainer with pressure tester and leak points for teaching how to test for leaks, cap faults and blown gasket symptoms.

Technical specification

Cap tester	Included
Panel	Steel frame
Experiments	Leak and cap testing
Power supply	230 V AC, 50 Hz

A hand pump pressurises the loop while students find simulated leaks and read pressure decay on a gauge.

Features

- Hand pressure pump with gauge
- Simulated leak points
- Radiator cap tester
- Transparent hose sections
- Complete coolant loop
- Test procedure sheet
