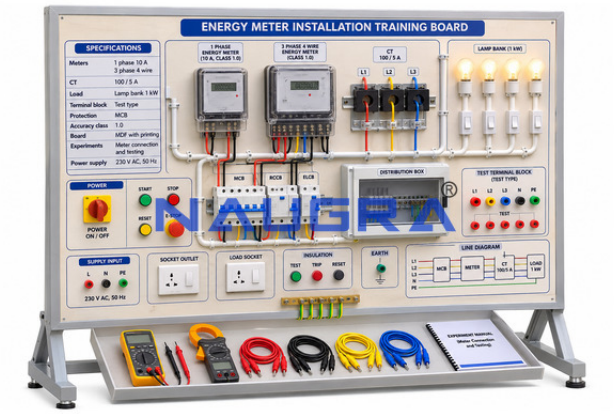
Product name:	Product code:
Energy Meter Installation Training Board	CMI-NP-1053



Description

A board with single and three phase energy meters, CT and test terminals for learning meter connection and testing of installation.

Technical specification

Accuracy class	1.0
Board	MDF with printing
Experiments	Meter connection and testing
Power supply	230 V AC, 50 Hz

Students connect meters with correct phase sequence and verify readings against a load. It builds meter installation skills.

Features

- Single and three phase meters
- Current transformer set
- Test terminal block
- Resistive and lamp load
- MCBs for protection
- Wiring diagrams
