Product name:	Product code:
Electro Hydraulic Sequence Control Trainer	CMI-NP-1066

Description

A trainer with solenoid valves, cylinders and relay logic for designing and testing hydraulic sequences such as clamp and press cycles.

Technical specification

Sensors	Limit and pressure switches
Tank	20 litre
Experiments	Sequence, clamp and press
Power supply	230 V AC, 50 Hz

Students wire relay circuits to control hydraulic cylinders in sequence and learn pressure and timing control.

Features

- Solenoid directional valves
- Hydraulic cylinders with limit switches
- Relay control module
- Pressure relief valve
- Power pack with gauge
- Quick couplings

Technical Specifications

Pump	Gear, 3 litre/min
Pressure	up to 60 bar
Valves	4/3 solenoid, 24 V DC
Cylinders	2 nos, 32 mm
Relays	8 nos
