Product name:	Product code:
DC Motor Drive Training System	CMI-NP-1075

Description

A DC motor drive trainer with thyristor or chopper control, tacho feedback and load, used to teach speed control of DC motors.

Technical specification

Display	Digital
Protection	Overcurrent
Experiments	Open loop, closed loop, regulation
Power supply	230 V AC, 50 Hz

Students vary armature voltage and study speed regulation and torque characteristics under load.

Features

- DC motor with tacho
- Thyristor drive
- Speed and current feedback
- Brake load
- Meters for V, A, rpm
- Protection circuits

Technical Specifications

Motor	0.5 kW, 220 V DC
Drive	4 quadrant or single quadrant
Speed	0 to 1500 rpm
Feedback	Tacho and current
Load	Magnetic powder brake
