Product name:	Product code:
Soft Starter Motor Training Set	CMI-NP-1077

Description

A soft starter training set with induction motor and load for comparing DOL, star delta and soft starting current and torque.

Technical specification

Protection	Overload, phase loss
Experiments	Start comparison and ramp
Power supply	230 V AC, 50 Hz

Students record starting current for each method and see how soft starters reduce stress on motors.

Features

- Soft starter unit
- Three phase induction motor
- Current clamp meter
- Starter comparison panel
- Brake load
- Parameter setting

Technical Specifications

Soft starter	3 kW, 415 V
Motor	1.5 kW, 3 phase
Ramp time	1 to 30 s
Current limit	Adjustable
Meters	V, A
Load	Brake
