Product name:	Product code:
Common Rail Diesel Engine Training Set	CMI-NP-1080

Description

A diesel engine with common rail injection and ECU for teaching modern diesel management and diagnostics.

Technical specification

Fuel	Diesel
Experiments	Pressure, injection, faults
Power supply	230 V AC, 50 Hz

Students study rail pressure, injector control and sensors on a running engine under safe supervision.

Features

- Common rail system
- High pressure pump and rail
- Injectors with ECU
- Sensor and actuator panel
- Diagnostic interface
- Fault simulation

Technical Specifications

Engine	4 cylinder diesel, 1.5 to 2.0 litre
Rail pressure	up to 1600 bar
Injectors	Solenoid type
ECU	Common rail
Diagnostics	OBD
Sensors	Rail pressure, MAF, crank
