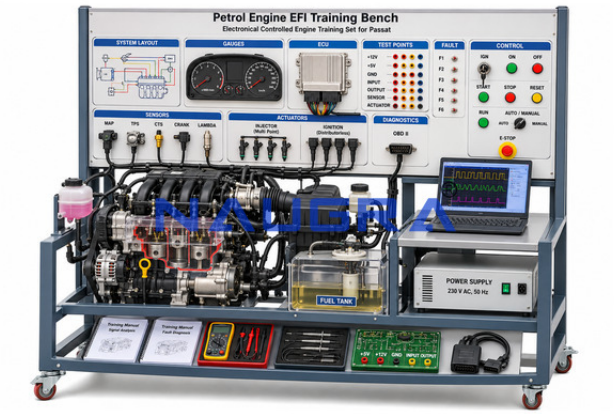
NAUGRA®

Product name:	Product code:
Petrol Engine EFI Training Bench	CMI-NP-1084



Description

A running petrol engine on a bench with electronic fuel injection, sensors and actuators, used to teach engine management and diagnosis.

Technical specification

Panel	Gauges and test points
Fuel tank	Included
Experiments	Signal analysis, fault diagnosis
Power supply	230 V AC, 50 Hz

Students observe sensor signals, fuel injection and ignition control on a live engine and practise fault finding.

Features

- Running EFI petrol engine
- Exposed wiring harness
- Sensors and actuators
- Diagnostic socket
- Fault insertion
- Instrument panel

Technical Specifications

Engine	4 cylinder, 1000 to 1600 cc
Injection	Multi point
Ignition	Distributorless
Sensors	MAP, TPS, CTS, crank, lambda
Diagnostics	OBD II
