NAUGRA®

Product name:	Product code:
Digital Electronics Installation Training Board	CMI-NP-1085

Description

A board for assembling and wiring digital circuits with ICs, switches and LEDs, used for hands on installation and testing of logic circuits.

Technical specification

ICs	TTL and CMOS set
Breadboard	Solderless
Experiments	Gates, counters, flip flops
Power supply	230 V AC, 50 Hz

Students install gates, counters and displays on a wiring field and test their operation.

Features

- IC sockets and breadboards
- Logic switches and LEDs
- Seven segment displays
- Clock generator
- Regulated supply
- Experiment manual
