Product name:	Product code:
Electronic Component Identification Trainer	CMI-NP-1087

Description

A trainer showing real electronic components mounted on a panel with labels and test points for identification and testing.

Technical specification

Use	Identification and testing
Experiments	Component testing
Power supply	230 V AC, 50 Hz

Students learn resistor codes, capacitor types, diodes and transistors, and test each part with a multimeter.

Features

- Panel mounted components
- Labelled with values
- Test sockets
- Colour code chart
- Multimeter practice
- Component test jig

Technical Specifications

Components	Resistors, capacitors, inductors, diodes, transistors
Items	40 nos mounted
Test points	4 mm
Chart	Resistor colour code
Meter	Digital multimeter (optional)
Panel	Printed
