NAUGRA®

Product name:	Product code:
PCB Fabrication Training Set	CMI-NP-1088

Description

A PCB making set with photo resist board, UV exposure unit and etching tank, used to teach printed circuit manufacture.

Technical specification

Timer	Built in
Experiments	Layout, exposure, etch, drill
Power supply	230 V AC, 50 Hz

Students transfer a layout, expose, develop, etch and drill a board to produce a working circuit.

Features

- UV exposure unit
- Etching tank with heater
- Photo resist copper boards
- Developer and etchant
- Drilling tool
- Safety gear

Technical Specifications

UV unit	Exposure area 160 x 250 mm
Etching tank	Heated, 1 litre
Boards	Photo sensitive FR4
Developer	Sodium hydroxide
Etchant	Ferric chloride
Drill	Mini, 0.8 to 1.2 mm
