NAUGRA®

Product name:	**Product code:**
Basic Electronics Training Workstation	CMI-NP-1090

Description

A basic electronics workstation with built in supplies, function generator and breadboard for experiments on diodes, transistors and amplifiers.

Technical specification

Components	Resistors, transistors, diodes, ICs
Protection	Short circuit
Experiments	Diodes, BJT, op amp
Power supply	230 V AC, 50 Hz

Students build circuits and measure with the integrated instruments, covering the common first year electronics lab.

Features

- Dual regulated DC supply
- Function generator
- Digital multimeter
- Solderless breadboard
- Component set
- Experiment manual

Technical Specifications

DC supply	+/- 15 V and 5 V, 1 A
Function generator	1 Hz to 100 kHz
Waveforms	Sine, square, triangle
Meter	3.5 digit digital
Breadboard	2 nos
