NAUGRA®

Product name:	Product code:
Digital Logic and Microcontroller Training Platform	CMI-NP-1091

Description

A platform with logic ICs and an 8051 or ARM microcontroller board to teach digital circuits and programming together.

Technical specification

Clock	Variable
Experiments	Logic, counters, embedded programs
Power supply	230 V AC, 50 Hz

Students go from gates and counters to coding a microcontroller with LEDs, keypad and LCD on the same unit.

Features

- Logic modules and ICs
- Microcontroller board
- LED, keypad and LCD
- USB programming
- Regulated supplies
- Sample programs

Technical Specifications

Microcontroller	8051 or ARM Cortex-M
Logic	TTL and CMOS modules
Display	16 x 2 LCD
Keypad	4 x 4
Interface	USB
Supply	5 V and 12 V DC
