NAUGRA®

Product name:	Product code:
Operational Amplifier and Analog Circuits Trainer	CMI-NP-1093

Description

An analog circuits trainer with op amp modules for experiments on amplifiers, filters, oscillators and comparators.

Technical specification

Protection	Short circuit
Experiments	Amplifier, filter, oscillator
Power supply	230 V AC, 50 Hz

Students build circuits such as inverting amplifier, integrator and active filter and examine them with an oscilloscope.

Features

- Op amp IC modules
- Dual supply
- Function generator input
- Resistor and capacitor banks
- Test points
- Experiment manual

Technical Specifications

Op amp	741 or equivalent, 4 nos
Supply	+/- 12 V DC
Signal source	Sine, square
Components	R, C banks
Test points	Scope ready
Breadboard	Solderless
