NAUGRA®

Product name:	Product code:
Excavator Hydraulic Fault Diagnosis Training Simulator	CMI-NP-1117

Description

Simulator with switchable faults such as leaking cylinders, clogged filters and worn pumps for practising diagnosis of hydraulic and PLC control problems on excavators. Key highlights include twelve switchable hydraulic and electrical faults and pressure and flow test points.

Technical specification

Pressure	0-250 bar
Flow	0-60 L/min
Tank	40 L with temperature gauge
Dimensions	1300 x 700 x 1600 mm

Standard Accessories

- Test hoses
- Manual

Simulator with switchable faults such as leaking cylinders, clogged filters and worn pumps for practising diagnosis of hydraulic and PLC control problems on excavators. Key highlights include twelve switchable hydraulic and electrical faults and pressure and flow test points.

Features

- Twelve switchable hydraulic and electrical faults
- Pressure and flow test points
- PLC fault logging
- Filter clogging indicator
- Diagnostic worksheets

Technical Specifications

Supply	415 V AC three phase
Faults	12 simulated
PLC	24 I/O
