Product name:	Product code:
Pneumatic Manipulator Fault Diagnosis Training Device	CMI-NP-1126

Description

Manipulator trainer fitted with fault switches for blocked ports, sensor failure and valve faults used to teach systematic troubleshooting of pneumatic automation systems. Key highlights include eight pneumatic and electrical faults and sensor misalignment exercise.

Technical specification

Sensors	Reed and inductive
PLC	16 I/O
Test points	4 mm sockets
Dimensions	800 x 500 x 600 mm

Standard Accessories

- Test leads
- Manual

Manipulator trainer fitted with fault switches for blocked ports, sensor failure and valve faults used to teach systematic troubleshooting of pneumatic automation systems. Key highlights include eight pneumatic and electrical faults and sensor misalignment exercise.

Features

- Eight pneumatic and electrical faults
- Sensor misalignment exercise
- LED status indicators
- Pressure test points
- Fault log worksheets

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Faults	8 switchable
Air supply	5-6 bar, filtered
