Product name:	Product code:
Cascade Flow and Pressure Control Training System	CMI-NP-1130

Description

Dual-loop control trainer where a pressure master controller sets a flow slave loop to demonstrate cascade control and its improved disturbance rejection. Key highlights include master and slave controller loops and flow and pressure transmitters.

Technical specification

Controllers	2 nos digital PID
Output	4-20 mA
Recorder	USB data logging
Pump	0.37 kW
Dimensions	1100 x 600 x 1600 mm

Standard Accessories

- USB cable
- Manual

Dual-loop control trainer where a pressure master controller sets a flow slave loop to demonstrate cascade control and its improved disturbance rejection. Key highlights include master and slave controller loops and flow and pressure transmitters.

Features

- Master and slave controller loops
- Flow and pressure transmitters
- Disturbance valve
- Trend recorder
- Software tuning

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Flow	0-20 L/min
Pressure	0-2 bar
