Product name:	Product code:
Flow Loop PID Control Training Rig	CMI-NP-1131

Description

Closed water loop with pump, control valve and flow transmitter for tuning PID controllers and studying flow control responses in process instrumentation labs. Key highlights include pump and control valve loop and electromagnetic or turbine flowmeter.

Technical specification

Control valve	Pneumatic or motorised
Transmitter	4-20 mA
Controller	Digital PID
Tank	40 L SS
Frame	1000 x 600 x 1500 mm

Standard Accessories

- Interconnection leads
- Manual

Closed water loop with pump, control valve and flow transmitter for tuning PID controllers and studying flow control responses in process instrumentation labs. Key highlights include pump and control valve loop and electromagnetic or turbine flowmeter.

Features

- Pump and control valve loop
- Electromagnetic or turbine flowmeter
- PID controller tuning
- 4-20 mA signals
- Transparent piping

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Flow range	0-20 L/min
Pump	0.37 kW centrifugal
