NAUGRA®

Product name:	Product code:
Flow Measurement Calibration Training Setup	CMI-NP-1132

Description

Setup with orifice, rotameter, turbine and electromagnetic meters in series with a weighing tank for comparing and calibrating flow measurement devices. Key highlights include orifice, rotameter and turbine meters and weigh tank calibration.

Technical specification

DP cell	0-100 mbar, 4-20 mA
Weigh tank	20 L
Pump	0.5 hp
Pipe	25 mm clear PVC
Dimensions	1500 x 600 x 1500 mm

Standard Accessories

- Flow charts
- Manual

Setup with orifice, rotameter, turbine and electromagnetic meters in series with a weighing tank for comparing and calibrating flow measurement devices. Key highlights include orifice, rotameter and turbine meters and weigh tank calibration.

Features

- Orifice, rotameter and turbine meters
- Weigh tank calibration
- Differential pressure transmitter
- Digital indicators
- Flow regulating valves

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Flow range	0-25 L/min
Meters	4 types in series
