Product name:	Product code:
Multi Sensor Pressure Temperature Force Data Acquisition Trainer	CMI-NP-1136

Description

Combined trainer with force, pressure and temperature sensors feeding a USB data acquisition unit and software for plotting and analysing measurements on a computer. Key highlights include three sensor channels on one panel and uSB data acquisition.

Technical specification

DAQ	12 bit, USB, 8 channel
Force	0-5 kg
Pressure	0-10 bar
Temperature	Ambient to 150 deg C
Software	Windows
Panel	600 x 400 mm

Standard Accessories

- USB cable
- Software CD
- Manual

Combined trainer with force, pressure and temperature sensors feeding a USB data acquisition unit and software for plotting and analysing measurements on a computer. Key highlights include three sensor channels on one panel and uSB data acquisition.

Features

- Three sensor channels on one panel
- USB data acquisition
- Plotting and logging software
- Selectable amplifier gains
- Calibration exercises

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Channels	Force, pressure, temperature
