Product name:	Product code:
Pressure Transducer Characteristics Training Kit	CMI-NP-1138

Description

Kit with a pressure transducer, hand pump, test gauge and signal conditioner for studying output linearity, hysteresis and calibration of pressure sensors. Key highlights include hand pump pressure source and test gauge comparison.

Technical specification

Pump	Hand, with relief valve
Accuracy	+/-0.5 pct FS
Panel	400 x 300 mm

Standard Accessories

- Hand pump
- Tubing
- Manual

Kit with a pressure transducer, hand pump, test gauge and signal conditioner for studying output linearity, hysteresis and calibration of pressure sensors. Key highlights include hand pump pressure source and test gauge comparison.

Features

- Hand pump pressure source
- Test gauge comparison
- Signal conditioner
- 4-20 mA and 0-5 V outputs
- Hysteresis plotting

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Range	0-10 bar
Transducer	Piezoresistive
Output	0-5 V, 4-20 mA
Test gauge	100 mm dial
