Product name:	Product code:
Hydraulic Circuit Electrical Fault Finding Training Panel	CMI-NP-1145

Description

Panel with electro-hydraulic circuits including limit switches and relay controls where electrical faults can be inserted to teach combined hydraulic and electrical diagnosis. Key highlights include relay and limit switch circuit and insertable wire and sensor faults.

Technical specification

Limit switches	4 nos
Cylinders	2 nos
Faults	10 switchable
Dimensions	1200 x 600 x 1500 mm

Standard Accessories

- Test leads
- Manual

Panel with electro-hydraulic circuits including limit switches and relay controls where electrical faults can be inserted to teach combined hydraulic and electrical diagnosis. Key highlights include relay and limit switch circuit and insertable wire and sensor faults.

Features

- Relay and limit switch circuit
- Insertable wire and sensor faults
- Hydraulic power pack
- Sequence control of two cylinders
- Multimeter test points

Technical Specifications

Supply	415 V AC, 3 phase
Control voltage	24 V DC
Relays	6 nos
