Product name:	Product code:
Hydraulic Pump Fault Simulation Training Bench	CMI-NP-1149

Description

Bench with a gear pump and switchable faults such as low flow and cavitation so trainees measure pressure and flow to diagnose pump problems. Key highlights include simulated pump wear and cavitation and flow and pressure gauges.

Technical specification

Tank	40 L
Dimensions	1200 x 600 x 1500 mm

Standard Accessories

- Hose set
- Manual

Bench with a gear pump and switchable faults such as low flow and cavitation so trainees measure pressure and flow to diagnose pump problems. Key highlights include simulated pump wear and cavitation and flow and pressure gauges.

Features

- Simulated pump wear and cavitation
- Flow and pressure gauges
- Relief valve adjustment
- Fault selector valves
- Transparent reservoir

Technical Specifications

Supply	415 V AC, 3 phase
Pump	Gear, 11 cc/rev
Pressure	0-100 bar
Motor	2.2 kW
Flow meter	0-30 L/min
