Product name:	Product code:
Stepper Motor Trainer	CIVIL-SMT-91-0001

Description

Stepper Motor Trainer

Technical specification

Features

1. Industrial stepper motor controller and driver
2. Speed and position control
3. Stable aluminum frame
4. Straight line shaft drive
5. Position detection encoder
6. Trainings on basic skills, professional skills, and post skills are completed through project content drafting, project analysis, project implementation, project summary, and ability assessment.
7. Adopting computer simulation, this stepper motor trainer solves the problem of training theory and experiment deviating from practical application through operation, simulation and emulation.

Training Projects

1. Stepper motor principle
2. Shaft drive control
3. Controller and driver wiring
4. Control of the number of pulses
5. Sequential control
