Product name:	Product code:
Interacting Two Tank Level Control Training System	CMI-NP-1207

Description

System with two connected tanks to study interacting level dynamics, coupling effects and multi-loop tuning in process control. Key highlights include two coupled acrylic tanks and adjustable interconnection valve.

Technical specification

Controller	Dual PID
Dimensions	1000 x 600 x 1400 mm

Standard Accessories

- Interconnection leads
- Manual

System with two connected tanks to study interacting level dynamics, coupling effects and multi-loop tuning in process control. Key highlights include two coupled acrylic tanks and adjustable interconnection valve.

Features

- Two coupled acrylic tanks
- Adjustable interconnection valve
- Two level transmitters
- Dual loop control
- Step response measurement

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Tanks	2 x 10 L
Level	0-400 mm each
Transmitters	2 nos, 4-20 mA
Pump	0.25 kW
