Product name:	Product code:
Earth Leakage and RCD Protection Training Unit	CMI-NP-1211

Description

Unit with RCCB, ELCB and earth electrode simulation to demonstrate residual current tripping, earth resistance and safety of low voltage installations. Key highlights include rCCB and ELCB operation and adjustable leakage current.

Technical specification

Load	Lamp
Panel	600 x 400 mm

Standard Accessories

- Test leads
- Manual

Unit with RCCB, ELCB and earth electrode simulation to demonstrate residual current tripping, earth resistance and safety of low voltage installations. Key highlights include rCCB and ELCB operation and adjustable leakage current.

Features

- RCCB and ELCB operation
- Adjustable leakage current
- Earth resistance simulation
- Trip time measurement
- Shock hazard demonstration

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
RCCB	25 A, 30 mA
Leakage range	0-300 mA
Trip time	Digital display
Earth	0-100 ohm simulated
