Product name:
Motor Protection Relay and Starter Simulation Training System

Product code:
CMI-NP-1214

Description

System with overload, earth fault and phase failure relays and starters to demonstrate motor protection settings and trip behaviour at low voltage. Key highlights include overload and earth fault relay and phase failure and unbalance protection.

Technical specification

Settings	0.5-10 A
Fault switches	6
Panel	800 x 600 mm

Standard Accessories

- Test leads
- Manual

System with overload, earth fault and phase failure relays and starters to demonstrate motor protection settings and trip behaviour at low voltage. Key highlights include overload and earth fault relay and phase failure and unbalance protection.

Features

- Overload and earth fault relay
- Phase failure and unbalance protection
- DOL and star delta starter
- Trip indication
- Adjustable settings

Technical Specifications

Supply	415 V AC, 3 phase
Relays	Thermal, electronic
Contactors	4 nos
Motor	0.75 kW
