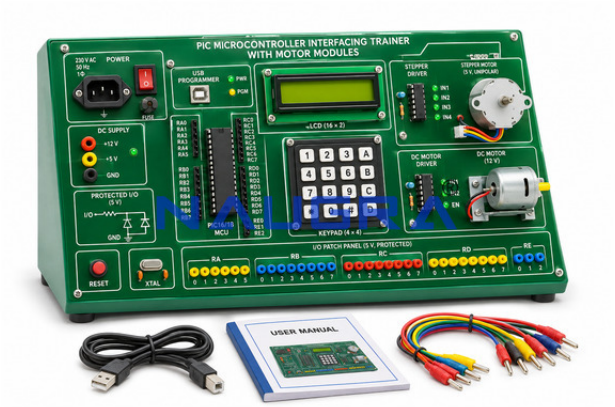
NAUGRA®

Product name:	Product code:
PIC Microcontroller Interfacing Trainer with Motor Modules	CMI-NP-1218



Description

Trainer with PIC microcontroller and interface boards for stepper motor, DC motor, relay and sensor control used for learning embedded control programming. Key highlights include pIC microcontroller board and stepper and DC motor driver.

Technical specification

DC motor	12 V with driver
LCD	16 x 2
Programmer	USB
Board	300 x 200 mm

Standard Accessories

- USB cable
- Manual

Trainer with PIC microcontroller and interface boards for stepper motor, DC motor, relay and sensor control used for learning embedded control programming. Key highlights include pIC microcontroller board and stepper and DC motor driver.

Features

- PIC microcontroller board
- Stepper and DC motor driver
- Relay and sensor modules
- LCD and keypad
- In-circuit programmer

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Controller	PIC16/18
Stepper	5 V, unipolar
