Product name:	Product code:
Laboratory Water Bath with Digital Temperature Control	CMI-NP-1251

Description

Stainless steel water bath with a digital controller used for warming samples and conducting temperature controlled reactions in school and college laboratories. Key highlights include stainless steel chamber and digital temperature controller.

Technical specification

Capacity	6 L
Power	1000 W
Chamber	SS 304
Cover	Concentric rings
Dimensions	400 x 250 x 200 mm

Standard Accessories

- Water level indicator

Stainless steel water bath with a digital controller used for warming samples and conducting temperature controlled reactions in school and college laboratories. Key highlights include stainless steel chamber and digital temperature controller.
