NAUGRA®

Product name:	Product code:
Function Generator and Cathode Ray Oscilloscope Combo Trainer	CMI-NP-1268

Description

Educational bench unit with a function generator and dual trace oscilloscope for generating and observing waveforms in electrical engineering laboratories. Key highlights include sine, square and triangle output and dual trace display.

Technical specification

Display	6 inch screen
Sensitivity	5 mV/div
Probes	2 nos, 1:1 and 10:1

Standard Accessories

- Probes
- Manual

Educational bench unit with a function generator and dual trace oscilloscope for generating and observing waveforms in electrical engineering laboratories. Key highlights include sine, square and triangle output and dual trace display.

Features

- Sine, square and triangle output
- Dual trace display
- Frequency counter
- Trigger and time base controls
- Probes included

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Oscilloscope	20 MHz, dual channel
Generator	0.2 Hz to 2 MHz
Waveforms	Sine, square, triangle
