NAUGRA®

Product name:	Product code:
Variable DC Power Supply Bench Unit	CMI-NP-1269

Description

Regulated bench power supply with dual outputs and digital display used for powering circuits and conducting experiments in electrical and electronics labs. Key highlights include dual variable outputs and constant voltage and current.

Technical specification

Regulation	Line 0.01 pct
Ripple	Less than 1 mV
Display	Digital V and A
Dimensions	360 x 260 x 160 mm

Standard Accessories

- Power cord

Regulated bench power supply with dual outputs and digital display used for powering circuits and conducting experiments in electrical and electronics labs. Key highlights include dual variable outputs and constant voltage and current.

Features

- Dual variable outputs
- Constant voltage and current
- Digital meters
- Short circuit protection
- Fixed 5 V output

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Output	0-30 V, 0-3 A, 2 channels
Fixed	5 V, 3 A
