Product name:	Product code:
Three Tank Liquid Mixing Process Station	CMI-NP-1366

Description

Three Tank Liquid Mixing Process Station is a process station designed for studying cascaded mixing, level and flow control with three tanks.

Technical specification

Software	SCADA
Power Supply	230 V AC, 50 Hz

Standard Accessories

- PC
- Manual

The Three Tank Liquid Mixing Process Station is a process station built for studying cascaded mixing, level and flow control with three tanks.

Features

- Three interconnected tanks
- PID level control
- Analogue sensors
- Pumps and control valves
- Data logging software

Technical Specifications

Tanks	3 x 15 litres
Level Sensors	4 to 20 mA
Pumps	2 centrifugal
Control Valves	proportional
Controller	PLC, PID
