NAUGRA®

Product name:	Product code:
Transformer Testing and Maintenance Trainer	CMI-NP-1377

Description

Transformer Testing and Maintenance Trainer is a trainer designed for performing open circuit, short circuit and insulation tests on transformers.

Technical specification

Protection	MCB
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Test leads
- Manual

The Transformer Testing and Maintenance Trainer is a trainer built for performing open circuit, short circuit and insulation tests on transformers.

Features

- Single phase transformer under test
- Meters on panel
- Variac supply
- Insulation tester
- Includes maintenance practice

Technical Specifications

Transformer	1 kVA, 230 V/115 V
Tests	OC, SC, insulation
Meters	V, A, W
Variac	0-270 V, 4 A
Insulation Tester	500 V DC
