Product name:	Product code:
Optical Fibre Sensor Training Unit	CMI-NP-1383

Description

Optical Fibre Sensor Training Unit is a training unit designed for learning fibre optic sensing of position, light and displacement.

Technical specification

Target	micrometer stage
Supply	24 V DC

Standard Accessories

- Fibre set
- Manual

The Optical Fibre Sensor Training Unit is a training unit built for learning fibre optic sensing of position, light and displacement.

Features

- Fibre optic amplifier and fibres
- Reflective and through-beam heads
- Digital display
- Movable target
- Teaching experiments

Technical Specifications

Fibre	plastic, 1 mm
Amplifier	digital, 10 to 30 V DC
Sensing Distance	0 to 100 mm
Response Time	1 ms
Display	4 digit
