Product name:	Product code:
CNC PCB Prototyping Machine Trainer	CMI-NP-1386

Description

CNC PCB Prototyping Machine Trainer is a trainer designed for milling and drilling circuit boards directly from design files.

Technical specification

Standard Accessories

- Tool bits
- Software
- Manual

The CNC PCB Prototyping Machine Trainer is a trainer built for milling and drilling circuit boards directly from design files.

Features

- Three axis CNC with spindle
- Vacuum bed
- Auto tool change option
- Software included
- Enclosed guard
