Product name:	Product code:
PCB Schematic Capture and Simulation Training Software Kit	CMI-NP-1393

Description

PCB Schematic Capture and Simulation Training Software Kit is a training kit designed for drawing schematics and simulating analogue and digital circuits before layout.

Technical specification

Output	netlist
Exercises	25
Supply	230 V AC, 50 Hz

Standard Accessories

- Licence key
- Manual

The PCB Schematic Capture and Simulation Training Software Kit is a training kit built for drawing schematics and simulating analogue and digital circuits before layout.

Features

- Circuit simulation software
- Library of components
- Includes lab exercises
- Educational licence
- Works with PCB layout tools

Technical Specifications

Software	schematic and SPICE simulation
Library	10000 plus parts
Operating System	Windows
Licences	10 users
