Product name:	Product code:
PLC and VFD Motor Control Training System	CMI-NP-1400

Description

PLC and VFD Motor Control Training System is a training system designed for controlling motor speed and direction by PLC through a variable frequency drive.

Technical specification

Protection	MCB
Supply	230 V AC, 50 Hz

Standard Accessories

- Cables
- Software
- Manual

The PLC and VFD Motor Control Training System is a training system built for controlling motor speed and direction by PLC through a variable frequency drive.

Features

- Push button control
- Analog output
- VFD and three phase motor
- Panel meters
- Fault protection
- Programming exercises

Technical Specifications

PLC	24 I/O
VFD	0.75 kW
Motor	0.37 kW, 3 phase
Frequency	0 to 50 Hz
Interface	0 to 10 V
