Product name:	Product code:
Elevator Safety Gear and Governor Training Rig	CMI-NP-1436

Description

Training rig showing an elevator overspeed governor, safety gear and buffer, used to teach lift safety systems, tripping tests and periodic inspection procedures to maintenance trainees.

Technical specification

Control	Push buttons with emergency stop
Power supply	230 V AC, 50 Hz

Standard Accessories

- Governor rope
- Operation manual

The Elevator Safety Gear and Governor Training Rig shows how a lift is stopped safely if it overspeeds. Trainees can watch the governor trip the safety gear on a short guide rail and practise inspection and reset procedures.
