NAUGRA®

Product name:	Product code:
Open Source Microcontroller Sensor Training Kit	CMI-NP-1473

Description

microcontroller and Sensor Based Embedded Training Kit is a training kit designed for building sensor and actuator projects with microcontroller.

Technical specification

Power	USB and adapter
Modules	20 nos

Standard Accessories

- USB cable
- Jumper wires
- Manual

The microcontroller and Sensor Based Embedded Training Kit is a training kit built for building sensor and actuator projects with microcontroller.

Features

- microcontroller board
- Sensor and module set
- Breadboard
- Relay and motor drivers
- Sample sketches

Technical Specifications

Board	microcontroller Uno type
Sensors	ultrasonic, temperature, IR, LDR
Display	LCD 16 x 2
Actuators	servo, DC motor, relay
Breadboard	830 points
