Product name:	Product code:
Activated Carbon Column Adsorption Trainer	CMI-NP-1475

Description

Activated Carbon Column Adsorption Trainer is a trainer designed for studying breakthrough curves in a packed activated carbon column.

Technical specification

Sampling Points	4
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Adsorbent
- Manual

The Activated Carbon Column Adsorption Trainer is a trainer built for studying breakthrough curves in a packed activated carbon column.

Features

- Packed column with sample ports
- Feed pump and flow meter
- Feed tank
- Spectrophotometer option
- Stainless frame

Technical Specifications

Column	50 mm dia., 600 mm height
Adsorbent	granular activated carbon
Feed Pump	0 to 100 ml/min
Flow Meter	rotameter
Tank	20 litres
