| Product name: | Product code: |
| --- | --- |
| Adsorption Isotherm Study Unit | CMI-NP-1477 |

## Description

Adsorption Isotherm Study Unit is a laboratory unit designed for determining Freundlich and Langmuir adsorption isotherms in batch tests.

## Technical specification

| | |
|---|---|
| Bath | stainless steel |
| Power Supply | 230 V AC, 50 Hz |

**Standard Accessories**

- Flasks
- Filter paper
- Manual

The Adsorption Isotherm Study Unit is a laboratory unit built for determining Freundlich and Langmuir adsorption isotherms in batch tests.

**Features**

- Shaker with flask rack
- Variable temperature water bath
- Set of stoppered flasks
- Digital timer
- Compact bench model

**Technical Specifications**

| | |
|---|---|
| Flasks | 12 x 250 ml |
| Shaker Speed | 50 to 250 rpm |
| Temperature | ambient to 60 deg C |
| Adsorbent | activated carbon |
| Timer | 0 to 99 min |
